ND Telemedicine Sprint Planning Notes

Team: Team-Bash

Sprint: 0

Date: 12/08/2022

Attended:

Scrum Master: Kaida Zhang

Product Owner: Liza Tawaf

Development team: Kaida Zhang, Haochen Shi, Sifan Gao, Yifan Hu, Wenhao Lu

1. Things That Went Well

1.The collaboration among the team members was excellent.

2.All the user story have been written down.

3.We have many meeting minutes in this sprint.

4.All acceptance criteria have been written down.

2. Things That Could Have Gone Better

1. Spend too much time on group meetings.

2. Took too much time to get the work started.

3. Need better communication between group members.

3. Things That Surprised Us

1. The framework used for the back-end of the project, Spring boot, was something the team members were not familiar with, but they had been learning on it since the beginning of the project.

2. Each member was very active in setting the time for the meetings and attending them.

3. Each meeting has a clear plan of tasks.

4. Lessons Learned

1.Having a basic understanding of the process of scrum project.

2.Collaborating with each other to complete a project via Jira.

3. Communicate effectively with team members via Microsoft Teams.

5. Final Thoughts

1.Things to keep: Every team member will continue to work on the tasks that they assigned, and we will move on to the next sprint and implement the project as planned.

2.Things to change: we need to learn more programming skills especially on front-end, make sure that front-end programmer could handle flutter/dart, and we need better communications between front-end and back-end programmers.
